

## CAG Open Public Forum

# Should Southeast Asia Go Nuclear?

The open public forum takes on Southeast Asia as a geographic focus, centering around the energy requirements of the region, especially Indonesia, Malaysia, the Philippines, Thailand and Vietnam. These are the countries that are contemplating nuclear energy as a viable option even while there are equally strong positions for maintaining the region as nuclear-free. Issues of timetable, accessibility/availability of technologies, implementation, regulation, and safety are some of the questions that will be addressed by the panelists. Join us for an interactive two-hour forum with some of the leading minds to discuss these questions.

Date: Friday, 7 November 2008

Time: 10:00 am – 12:00 pm

Venue: Mannaseh Meyer Building, Seminar Room 3-1
